- Last names N-Z one canister of disinfecting wipes

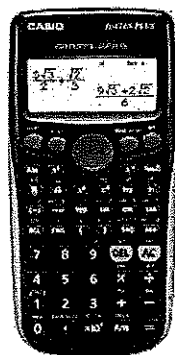

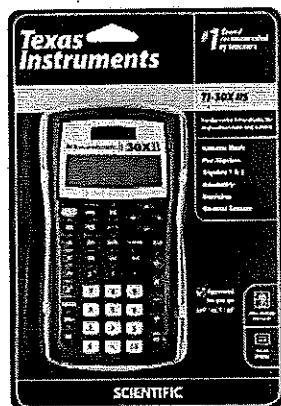

**LABEL ALL SUPPLIES WITH PERMANENT MARKER. THIS INCLUDES CALCULATORS!!**

## What Calculator do I need for September:

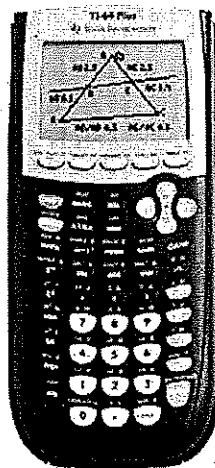

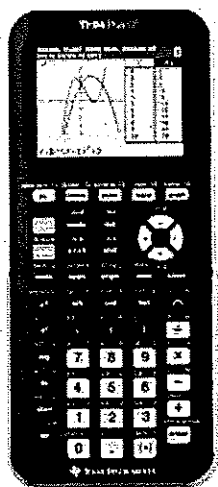

Math 6, 7, 7A, or 8: All students need their own Scientific Calculator.

Examples: TI 30X-IIS Casio (these are a little nicer as students can see what they calculated as well as the answer.)

Can be used for all years of Middle School Math except students taking Algebra 1 in eighth grade, who need the calculator below. If you bought one this year, you can use the same one.

Students taking Algebra 1 in eighth grade need a graphing calculator. TI84 Plus CE is nice because it graphs in colors, making it easy to see differences. You will know you need this if you were invited to take this class. Students can also purchase at TI 84 Plus. They need these the first day. They will use these in high school math. These can be purchased at local stores as well as Amazon, and used on EBay and are expensive.

Email Mrs. O if you have questions.
